Help Bring **Missing** Children Home

Children on the autism spectrum may wander and become lost —community awareness helps speed recovery efforts.

- **Autism Spectrum Disorder (ASD)** increases the risk of injury or exploitation while a child is missing. Children with ASD who engage in elopement, especially if they are nonspeaking, **are often at extreme risk of drowning**. Those who elope may be close to where they were last seen and may hide from searchers.
- The ADAM™ Program **quickly distributes missing child posters** from the National Center for Missing & Exploited Children® (NCMEC) **containing a photo and important details** to the community in a specific, geotargeted area — for any type of missing child case including children with ASD.
- Sign up and share ADAM poster alerts to amplify reach. When more people receive ADAM alerts and help in the search efforts, the **likelihood of recognizing and recovering a missing child with ASD increases**.

missing child alerts in your area at
adamprogram.com

NCMEC uses the ADAM Program to quickly distribute a poster of a missing child, targeting a specific search area.

Donated by LexisNexis® Risk Solutions for use by NCMEC, the ADAM Program uses innovative technology to help in the recovery efforts of missing children.

How it Works

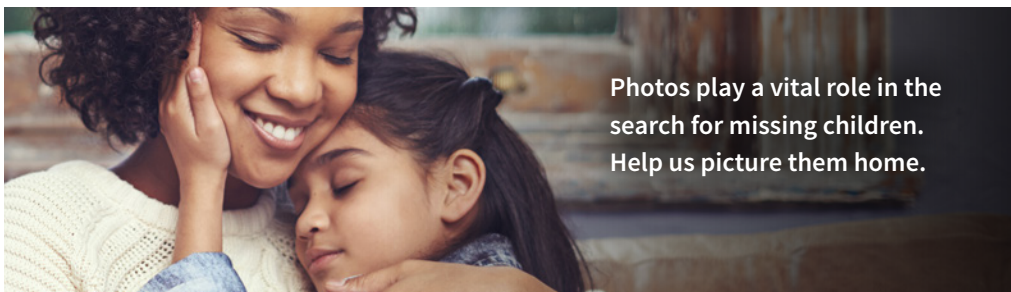

NCMEC sends a photo of a missing child and important case details – including geographic areas to target for poster distribution - to ADAM.

The ADAM technology matches the geo-targeted area selected by NCMEC with its recipient database, resulting in a list of businesses and individuals who will receive the missing child poster.

ADAM transmits the missing child poster to targeted recipients.

Join the ADAM Program.

Work with us to bring missing children home. Visit **adamprogram.com** to access the interactive missing child dashboard, sign up for alerts in your area and share a poster. Just one person can make a difference.

LexisNexis® Risk Solutions harnesses the power of data, sophisticated analytics platforms and technology solutions to provide insights that help businesses across multiple industries and governmental entities reduce risk and improve decisions to benefit people around the globe. Headquartered in metro Atlanta, Georgia, we have offices throughout the world and are part of RELX (LSE: REL/NYSE: RELX), a global provider of information-based analytics and decision tools for professional and business customers.
