

The LexisNexis® 15th Annual Mortgage Fraud Report

The LexisNexis® Mortgage Fraud Report examines the current composition of residential mortgage fraud and misrepresentation involving industry professionals in the United States. The report presents data and analysis to provide insights into current mortgage industry activities.

The Top Five States or Metropolitan Statistical Areas are highlighted for the following categories:

The LexisNexis Collusion Indicator Index is a ranking of states based on factors indicative of potential collusion activity.

The Investigation Mortgage Fraud Index is an indication of the amount of mortgage-related fraud and misrepresentation involving industry professionals found through the Mortgage Industry Data Exchange subscriber fraud investigations during 2012.

The Origination Mortgage Fraud Index is an indication of the amount of mortgage-related fraud and misrepresentation involving industry professionals found through the Mortgage Industry Data Exchange subscriber fraud investigations for 2012 originations.

Properties in Default shows the states most likely suffering from the largest percentages of properties in default.

Metropolitan Statistical Areas with highest incidence of Mortgage Industry Data Exchange reports for loans originated in 2012.
