

LexisNexis® Accurint® for Law Enforcement

Powerful data for quality investigative leads.

Law enforcement officers and analysts share the same goal when conducting an investigation – the need for information that can be used to help solve the case. Whether it's the first 48 hours after a reported missing person, a homicide or a burglary, information is what helps law enforcement bring the case one step closer to resolution.

In order to solve cases faster and more efficiently, law enforcement officers must quickly gather and analyze this comprehensive, current information. With access to over 37 billion public and proprietary records, and with the power of next-generation search technology, investigators can:

- Locate people and apprehend suspects
- Discover associations
- Uncover assets
- Investigate businesses
- Visualize complex relationships
- Map property and sex offender locations with advanced Google Maps™ technology

Search, Access, Link, Process, Analyze

LexisNexis® Accurint® for Law Enforcement is a cutting-edge investigative technology that can expedite the identification of people and their assets, addresses, relatives and business associates. It provides instant access to a comprehensive database of public records that would ordinarily take days to collect. Developed by experienced law enforcement professionals, it enables agencies to search, access, link, process and analyze the information they require, such as:

- Names, addresses and emails
- Death and criminal records
- Professional licenses
- Phone numbers, including possible cell phones
- Assets, including motor vehicles, watercraft and aircraft
- Bankruptcies, liens and judgments
- Real property records
- Social networking information
- Business information, including fictitious names
