

## Jail Booking Data for Accurint® for Government

Access Real-time, Nation-wide  
Incarceration Data

Searching for someone? Check  
whether they're behind bars  
with our unrivaled coverage  
of U.S. incarcerations.

LexisNexis® Risk Solutions now offers Jail Booking Data through Accurant® for Government. Get fast, easy access to accurate incarceration data.

## Exceptional coverage and timeliness

Most sources of criminal justice data are limited in scope and timeliness. They provide only limited coverage of booking records and update their datasets irregularly and as infrequently as every 90 days. Many records have few personal identifiers, making high-confidence person matching difficult. And each jurisdiction treats crime in its own way, creating discrepancies in how they interpret the classification and severity of crime.

LexisNexis® Jail Booking Data is a nationwide dataset that offers unrivaled coverage of over 85% of incarcerations in the U.S. Our data comes straight from the source. It's timely, rich, actionable and contains personally identifiable information. It includes:

**160M+ booking records**

**2,800+ law enforcement databases**

**Local booking data from facilities in 45 states**

**State Department of Corrections data from 27 states**

**Updates every hour and as frequently as every 15 minutes**

# Incarceration data saves government money and time

Government agencies need accurate incarceration data. It can inform decision-making in order to:

## LOCATE AND MONITOR NON-CUSTODIAL PARENTS

Child Support Enforcement professionals are charged with enforcing child support orders, monitoring cases for timely payment, and calculating child support obligations. To be effective, you need the ability to locate and monitor the whereabouts of non-custodial parents. That's not an easy task, especially if those parents become incarcerated.

Access to real-time incarceration data available through Accurant allows you to discover if, when and where these parents are being held. With that information you can address issues like modifying support obligations to stop accruing debt while the parent is incarcerated, which has been shown to increase the likelihood of future payments after release.

You can also place a Jail Booking Watch on non-custodial parents to receive an alert if they're ever booked into custody, released or incarcerated.

## EVALUATE APPLICANTS FOR LICENSES AND CLEARANCES

Before a professional license can be issued or an individual is awarded security clearance, a background check is necessary. Government organizations need to know about any criminal derogatory data. Jail Booking Data provides that critical information.

## EXPEDITE SOCIAL SERVICES FOR RELEASED INMATES

Released inmates returning to public life face many challenges. Social services that provide food, healthcare and financial assistance are crucial to reducing recidivism and a successful post-incarceration transition.

Former inmates are eligible for benefits like Medicare, Medicaid, SNAP and TANF. With Jail Booking Data, your agency can identify and process these individuals efficiently, which saves tax dollars in the long run.

Data and notifications provided through a single source help government agencies prevent entitlement fraud and ensure eligible recipients receive the benefits they need.

## Search, report, watch

Government agencies can use Jail Booking Data in a variety of ways:

 Search

### JAIL BOOKING SEARCH

Run a search to check for individuals using SSN, driver's license number or name and full date of birth.

### JAIL BOOKING REPORT

Select an identity from any matching records to run a report that includes details about the arrest, incarceration, release date and charges when available.

## Improve agency effectiveness

Because incarceration and social services are often connected, agencies need the ability to monitor beneficiaries of their services across the incarceration journey. With Jail Booking Data, they're able to keep tabs on individuals as they move from booking to release, helping government agencies to be more successful in their mission.

### About LexisNexis Risk Solutions

LexisNexis Risk Solutions harnesses the power of data and advanced analytics to provide insights that help businesses and governmental entities reduce risk and improve decisions to benefit people around the globe. We provide data and technology solutions for a wide range of industries including insurance, financial services, healthcare and government. Headquartered in metro Atlanta, Georgia, we have offices throughout the world and are part of RELX (LSE: REL/NYSE: RELX), a global provider of information-based analytics and decision tools for professional and business customers. For more information, please visit [www.risk.lexisnexis.com](https://www.risk.lexisnexis.com) and [www.relx.com](https://www.relx.com).

Our government solutions assist law enforcement and government agencies with deriving insight from complex data sets, improving operational efficiencies, making timely and informed decisions to enhance investigations, increasing program integrity and discovering and recovering revenue.

Jail Booking Data for Accurant for Government provided by LexisNexis is not provided by "consumer reporting agencies" as that term is defined in the Fair Credit Reporting Act (15 U.S.C. § 1681, et seq.) ("FCRA") and does not constitute a "consumer report" as that term is defined in the FCRA. Jail Booking Data for Accurant for Government may not be used in whole or in part as a factor in determining eligibility for credit, insurance, or employment or for any other eligibility purpose that would qualify it as a consumer report under the FCRA. Due to the nature and origin of public record information, the public records and commercially available data sources used in reports may contain errors. Source data is sometimes reported or entered inaccurately, processed poorly or incorrectly, and is generally not free from defect. This product or service aggregates and reports data, as provided by the public records and commercially available data sources, and is not the source of the data, nor is it a comprehensive compilation of the data. Before relying on any data, it should be independently verified. LexisNexis and the Knowledge Burst logo are registered trademarks of RELX Inc.
