LexisNexis® Provider Integrity Scan

Some see the forest. Others see the trees.
LexisNexis® data and analytics let you see both.
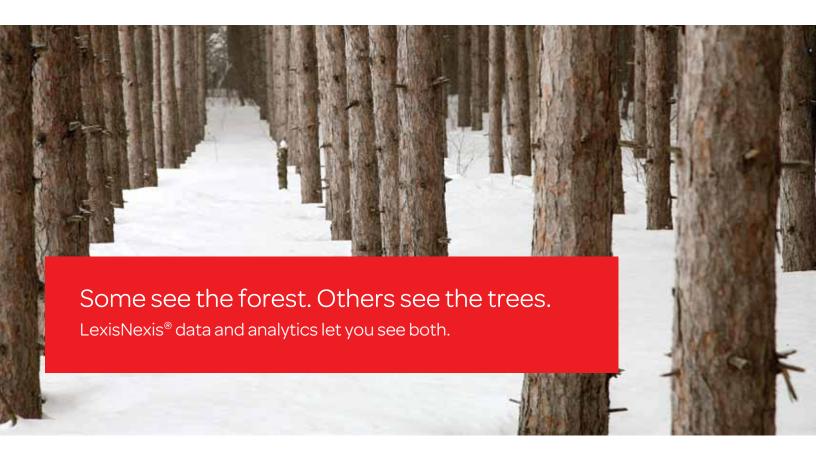

Billions of dollars are lost each year through fraud and improper payments to providers and beneficiaries of government-provided health care programs. As demand for services increases and resources continue to shrink, the need for accurate, actionable information has never been greater.

LexisNexis® Provider Integrity Scan leverages advanced data technology to assist government agencies in verifying and monitoring health care provider licensing and credentialing information, detecting and preventing inappropriate, fraudulent or criminal provider activity.

It's about automated access to accurate, actionable information. It's about improved workflow efficiency. It's about bottom-line results.

Implement a simple, powerful solution

LexisNexis Provider Integrity Scan is a comprehensive work solution that assists with both provider enrollment and program integrity efforts.

- Verify and validate the credentials of providers
- Implement robust, up-front enrollment screening for verification and risk assessment
- Screen all currently enrolled fee-for-service providers
- Monitor provider files for risk indicators between enrollment periods

Gain fast, easy access to actionable information

The LexisNexis Provider Integrity Scan solution gives users the ability to efficiently process multiple searches and obtain the critical information contained within massive volumes of data. From verification data to risk scoring and fraud indicators, this powerful tool uses advanced analytics to process and output the specific information you need.

LexisNexis®

Risk Solutions
Health Care

Isolate and eliminate high-risk and fraudulent activities

- Identify current and potential providers with sanctions, exclusions or criminal histories.
- Detect and prevent fraudulent and improper payments.
- Identify permissible yet high-risk indicators that require scrutiny post-enrollment.
- Identify providers who are convicted sex offenders or have been convicted of crimes of moral turpitude from enrolling with Medicare/Medicaid.

Receive provider update and risk alerts

This total solution also monitors provider files for updates and alerts staff of important changes, providing key insight after initial enrollment and screening.

You will receive:

- Deceased information with date of death.
- License status.
- Sanctions and exclusions.
- Criminal convictions.
- High-risk indicators for address and Social Security number (SSN).
- Financial information, such as liens, bankruptcies and judgments.
- Provider business ID verification.

Rely on industry-leading turnaround times

We know that your job is fast-paced and getting the information you need in your hands quickly is important. LexisNexis can return batch data runs in as little as 24 hours, depending on size, and our integrated data solutions can be delivered in near real time.

Input Elements	Output Data
The more input data elements that are provided, the more we can verify, and the more information we can return.	Provider Integrity Scan is easily configurable so you can remove any data set or output fields not needed.
