Streamline the crash reporting process from start to finish, and acquire the fresh insight you need to improve traffic safety and overall quality of life for the people you protect and serve.

Is a manual crash reporting process compromising the safety of your officers and your community?

A better solution exists and it’s available to you, at no cost.
For many law enforcement agencies, managing and distributing crash reports is an outdated, inefficient process that requires a lot of time, money and patience. That’s because the work is often manual, which results in frequent delays, data entry errors and minimal process standardization.

LexisNexis® eCrash can help by bringing simplicity and efficiency to the handling of crash reports. By automating the reporting process—from the scene of the accident to public report distribution—it provides a highly secure, electronic data management resource that helps agencies deliver faster crash report data, while advancing traffic safety and the quality of life for the people they protect and serve.

Save time and money with a complete crash management solution, offered at no charge to agencies

Among the countless benefits of LexisNexis eCrash, two advantages are paramount. First, it offers an end-to-end crash data management solution that streamlines and secures the entire report handling process from report data capture, storage and access to analysis and distribution.

Second, at a time when many agencies are challenged with budget cuts, this solution is available at no cost to law enforcement. That means there is no cost to acquire the technology, customize it, implement it, integrate it with agency specific mobile software or update it. Instead, the system pays for itself by assessing a modest convenience fee to citizens, insurers and other authorized parties who purchase the accident reports.

With LexisNexis eCrash, your agency can focus more on your core mission—providing the highest quality of public safety—and spend less time, manpower and money on tedious administrative details.

To provide an optimized crash reporting workflow, LexisNexis eCrash includes access to the following three service components.
LexisNexis Command Center

Streamlined reporting and real-time statistics for stronger safety tactics

Create a premium reporting workflow that ensures the utmost accuracy and process efficiency, and access comprehensive statistics and analytics that drive increased public safety.

- Simplify internal approvals by electronically managing crash reports.
- Boost public safety by accessing crash data by location, causation, external factors and more.
- Support nationwide investigations by searching for “persons of interest” based on crash-related criteria.

LexisNexis Police Reports

Reduce costs, increase efficiency and offer better service to citizens

Provide a convenient Web portal for purchasing crash reports online, that also allows you to easily track key metrics, including who purchased reports, when they purchased them, report revenue and more.

- Reduce in-person and phone requests by giving officers cards to distribute at the crash site, explaining how to access reports online.
- Improve report accessibility, dispersal and overall efficiency with 24/7 online availability.
- Enhance public service by allowing authorized parties to order their crash report from home.
A powerful investigative resource

With almost 400,000 new reports added to database each month, LexisNexis eCrash is a robust national database of crash reports and powerful investigative resource where data is shared exclusively by participating law enforcement agencies throughout the country.

The eCrash service is not provided by “consumer reporting agencies,” as that term is defined in the Fair Credit Reporting Act (15 U.S.C. § 1681, et seq.) (“FCRA”) and does not constitute “consumer reports,” as that term is defined in the FCRA. Accordingly, the eCrash service may not be used in whole or in part as a factor in determining eligibility for credit, insurance, employment or for any other eligibility purpose that would qualify it as a consumer report under the FCRA. Due to the nature of the origin of public record information, the public records and commercially available data sources used in reports may contain errors. Source data is sometimes reported or entered inaccurately, processed poorly or incorrectly, and is generally not free from defect. This product or service aggregates and reports data, as provided by the public records and commercially available data sources, and is not the source of the data, nor is it a comprehensive compilation of the data. Before relying on any data, it should be independently verified. LexisNexis and the Knowledge Burst logo are registered trademarks of RELX Inc.
