

LexisNexis® Homestead Exemption Fraud Detection

Detect Homestead Exemption Fraud and Boost Tax Revenue for Your Agency

Local governments can lose up to millions of dollars each year from fraudulent claims for homestead exemption tax relief.

Non-detection can be very taxing

Most commonly, fraudsters are either claiming multiple exemptions or claiming an exemption on a home that is not their primary residence. Many local governments don't have access to the technology to share data and communicate with each other, so fraud can go undetected. Over time this type of fraud can add up to hundreds of thousands of dollars in lost revenue and result in tax increases that law-abiding residents have to pay.

LexisNexis® Risk Solutions has an answer

LexisNexis® Risk Solutions Homestead Exemption Fraud Detection is an ongoing data solution that can help you identify and collect taxes from individuals that are defrauding the system. Our solution makes it easy for you to submit batches of data with minimal basic input information. We will run your batches against our vast collection of public and proprietary databases, giving you visibility across jurisdictions nationwide. Using LexID®, our advanced linking technology, this powerful tool isolates and flags probable cases of homestead exemption fraud thoroughly and efficiently.

A solution for you and your community

Local officials want to avoid raising taxes, especially while people are hurting financially. However, local governments are often faced with a shrinking tax base. Homestead Exemption Fraud Detection can alleviate this tax burden by helping you identify, locate and collect from those individuals in your jurisdiction who are unfairly and illegally claiming false exemptions. Offer your local citizens relief with a simple solution that can help you to:

- Detect fraudulent activities
- Identify data within a tax year that indicates multiple property ownership
- Determine current residency by searching sources such as driver's licenses and voter registration information
- Automatically search data sources across nationwide jurisdictions for unlimited visibility
- Cross-reference multiple years
- Determine if a death record is associated with the homeowner(s)
- Persuade individuals to comply with homestead exemption tax laws
- Generate additional tax revenue through paid back taxes
- Eliminate the need to raise local taxes and even reduce taxes

Powerful...and easy to use

Homestead Exemption Fraud Detection is a solution that uses property and deed ownership data to determine whether fraud is being committed by a homeowner or joint filers who are claiming multiple homestead exemptions. Using other public record and proprietary data sources, additional intelligence is offered to identify taxpayers who may be ineligible due to age requirements, are deceased or are not using the property as a primary residence.

Supporting our government for over 30 years

LexisNexis Risk Solutions is uniquely positioned to help U.S. federal, state and local government agencies transform data into mission-critical decisions with industry-leading technology and solutions. Our solutions analyze and link seemingly unrelated data and provide insightful output that enables government agencies to make more accurate, efficient and informed decisions.

Clarity, insight and success

At LexisNexis Risk Solutions, our team understands the unique challenges our customers face. We overcome challenges with unprecedented search technology, advanced analytics and essential decision-making information. Our proven and trusted solutions:

- Use innovative technology and world-class content to help you work in faster, easier and more effective ways
- Help government to reduce risk, improve productivity and increase revenue
- Are critically important to increasing compliance, ensuring that we all pay our fair share and eliminating the need to raise taxes

HOMESTEAD EXEMPTION FRAUD DETECTION IS OFFERED AS A BATCH PROCESS
