

EMPOWER WHOLE PERSON DATA-DRIVEN SDOH PLANNING & EVALUATION

CONSIDER 'BIG DATA' IN THE HEALTHCARE SYSTEM

HEALTH HAPPENS OUTSIDE HEALTHCARE SYSTEMS.

How does our data management approach reflect SDOH?

Data is more than clinical interactions -- where people live, work, and play affects a range of health and quality-of-life outcomes and risks.

DATA HAPPENS OUTSIDE HEALTHCARE SYSTEMS.

Studies show that medical determinants are only accountable for 20% of healthcare outcomes, whereas social determinants of health account for as much as 50%.

Real World Data in Real Time. Immediate Info on Social Determinants.

LOOK OUTSIDE YOUR DATA FOR THE FULL PICTURE

Having full context about people provides important information that could affect future outcomes for those individuals considered at-risk.

WHOLE PERSON DATA

Complete your whole person data ecosystem

When social risk data is combined with program and clinical data, we have a more holistic view of communities, enhancing quality of care and improved outcomes for the at-risk populations.
