

LexisNexis® Spectrum Analysis: Deep Knowledge of Your Beneficiaries Drives Big Savings

The Spectrum Analysis is a data-driven overview that identifies high-risk situations across your program beneficiary populations. Leveraging LexisNexis® Risk Solutions referential, identity data and analytics, the analysis offers a compiled view of individuals and populations for more informed decision-making.

When cost savings and accuracy are inseparable, authoritative data is paramount.

High-Impact Indicators Detected:

- ✓ Deceased individuals listed as active
- ✓ Synthetic and impersonated identities
- ✓ Out-of-state residencies
- ✓ High-risk addresses (vacant, non-residential, unverifiable)
- ✓ Incarceration indicators
- ✓ Digital identity risks
- ✓ High wealth indicators
- ✓ Dual participation across programs

Benefits

- ✓ **Fraud Prevention** – Detect identity manipulation and organized fraud.
- ✓ **Operational Efficiency** – Streamline workflows and reduce manual reviews.
- ✓ **Compliance & Oversight** – Support audits and reporting.
- ✓ **Digital Risk Management** – Identify high-risk digital behaviors.

The LexisNexis Risk Solutions Value Advantage:

Conducting a Spectrum Analysis can provide valuable insight right away, helping you assess the current state of your beneficiary population and identify areas for operational efficiencies. The information in a Spectrum Analysis can aid your agency in strengthening eligibility workflows and provide context when responding to legislative inquiries.

Why LexisNexis Risk Solutions?

LexisNexis® Risk Solutions is a trusted provider available to help your agency preserve program integrity while ensuring eligible individuals are not mistakenly removed from coverage or benefits.

Process Overview

1. Secure Data Submission –

Agencies submit data via encrypted channels.

2. Identity Matching & Risk

Scoring – Data is matched and enriched with risk indicators.

3. Expert Analysis – LexisNexis®

Special Investigations Unit (SIU) identifies fraud, inefficiencies, and compliance gaps.

4. Actionable Reporting –

Reports highlight risks, inefficiencies, and next steps.
