The fraud threat landscape is continually changing. Public demands for faster, simpler digital interactions are increasing. Can you protect your organization with strong levels of data security and fraud prevention while preserving a positive user experience for your citizens?

In a recent survey of state and local government agencies, respondents identified their top three priorities as maintaining a user-friendly experience, preventing fraud and abuse in enterprise sites/portals, and keeping pace with evolving technological standards.¹

The LexisNexis® Risk Defense Platform meets that agenda. It’s a customizable system that delivers a frictionless onboarding and authentication process for users while defending against ever-changing fraud threats.
Accelerate the identification of your citizens and prevent fraud with a multi-layered, risk-based approach

A responsive fraud prevention system delivers superior protection while allowing you to stay focused on your core mission and responsibilities.

Respond to a rapidly shifting threat environment

Timing is everything in the fight against fraud. The LexisNexis Risk Defense Platform is a flexible, configurable system designed to help you manage complex fraud and identity risk rules without having to divert operational resources. The platform provides a central connection point that equips your agency with a robust set of fraud and identity management capabilities. You also get intelligent reporting metrics that help you:

- Improve the citizen experience by eliminating unnecessary friction
- Adapt to rapidly evolving fraud threats with minimal resources
- Increase compliance with regulations protecting sensitive and citizen data
- Prevent fraud and account takeover by strengthening identity and device authentication online and in call centers

Through one simplified integration that requires minimal IT support, you have seamless access to a myriad of authentication tools and industry-proven best practices. You achieve secure authentication without slowing the process for citizens or disrupting agency workflow, all while keeping your fraud deflection strategy ahead of the next big threat.
Customize risk management

Balancing escalating citizen expectations with the potential threat posed by ever-expanding fraud schemes is an ongoing challenge. The right strategy keeps your operation in motion, streamlines citizen interactions and helps you avoid risky transactions.

Our Risk Defense Platform connects your agency with proven solutions that provide real-time risk assessment and the optimum level of authentication based on the risk of the specific transaction. We simplify a multi-layered approach to risk management by delivering access to the industry’s most authoritative solutions for:

- Fraud Analytics
- Verification
- Authentication
- Compliance

The result is a superior onboarding and authentication experience for citizens that at the same time minimizes your agency’s exposure to potential fraud.

Amplify risk visibility with a deeper perspective

Easily identify and authenticate your citizens and customers by leveraging the most extensive level of data coverage available in the industry today. Through LexisNexis® Fraud Defense Network, you get a more complete, robust level of actionable intelligence that goes far beyond the data available in your agency. You benefit from our access to over 78 billion public and proprietary records that provide coverage of 99.9 percent of the U.S. adult population. These resources combined with our proprietary technology can help you to further automate your onboarding and speed access management workflows.

Streamline interactions by conducting different levels of authentication in real time based on the risk level of the transaction.

- Fraud Analytics
  - LexisNexis® Device Assessment
  - LexisNexis® FraudPoint®
