

Innovative Vital Records Management

Innovative workflow solutions for recording, issuing and reporting of health statistics – all from a single, central system.

Reduce your daily workload

Maintaining and processing vital records such as births, deaths, spontaneous and induced terminations, marriages and divorces are time-consuming endeavors. With VitalIQ, your constituents can be assured of the safeguarding of their information, efficient reporting and on-demand issuance of vital records. But keeping up with those responsibilities isn't easy.

LexisNexis® VitalIQ simplifies your vital record management. A comprehensive, fully-integrated solution, it automates the issuance of records through our integration with VitalChek.com, freeing your agency staff to focus on other mission-critical tasks.

Expedite vital record orders

VitalIQ provides constituents the ability to request records easily by using online tools like VitalChek.com, in-person self-service or by visiting your local or state health department. The interface is user-friendly and highly intuitive, with familiar on-screen elements that guide users through the vital records registration and issuance processes. They can place their order and make payment with ease, no interaction with staff needed.

VitalIQ provides the ability to auto-match order requests to the event for efficient batching of certified copies. Additionally, VitalIQ provides accounting reports to quickly balance cashier receipts at the close of business.

Customize VitalIQ to your requirements

VitalIQ is a highly configurable solution designed to work with your existing workflows. It provides user access controls based for specific roles and users. Further customization is provided by using VitalIQ's unique administration tools that allow system administrators to customize screens and create ad-hoc reports on the fly.

You can also choose from an array of specialized modules to access specific datasets such as:

- | | |
|--|--|
| <input checked="" type="checkbox"/> Death | <input checked="" type="checkbox"/> FHIR |
| <input checked="" type="checkbox"/> Newborn Portal (pre-birth) | <input checked="" type="checkbox"/> ITOP |
| <input checked="" type="checkbox"/> Birth | <input checked="" type="checkbox"/> Marriage |
| <input checked="" type="checkbox"/> Fetal Death | <input checked="" type="checkbox"/> Divorce |

These modules offer further opportunities for you to streamline your agency services. For example, our newborn module puts control of the birth certificate into the mother's hands. As her pregnancy progresses, she'll automatically be sent the forms such as a Mother's Worksheet, Paternity Affidavit, etc., which can be completed online without hospital or agency involvement.

Turnkey implementation and ongoing support

The transition to VitalIQ is easy. We offer full service for fast, seamless implementation. You'll experience no downtime. Your staff will receive personalized training and have access to an attentive support team familiar with your agency's operation.

Your valuable data is secure

VitalIQ offers industry-best security measures for protecting vital records. It uses two-factor (optional) and identity authentication solutions. Sensitive data is encrypted, and an array of fraud prevention measures help keep cybercriminals from gaining access.

Fast Healthcare Interoperability Resources (FHIR)

VitalIQ offers seamless real-time reporting of deaths to NCHS using FHIR standards. Additionally, VitalIQ utilizes FHIR standards to integrate into Coroner Management Systems and other third-party applications such as cancer registries.

Enhance your constituent's experience

With VitalIQ for your vital records management, you're able to streamline all tasks from collecting data to receiving payment and issuing certificates. Automation improves efficiency and provides citizens with a favorable experience, while allowing agency staff to focus on other important areas.

With VitalIQ, your agency can expect the following benefits:

- Accurate, continuously updated data
- Increased productivity
- Reduced handling costs
- Optimized business processes

Your constituents will appreciate:

- Self-service that puts them in control
- Easy-to-follow instructions
- Quick, automated retrieval of information
- Expedited certificate copies
