LexisNexis® Provider Data Validation

Quality provider data opens the door to healthier business operations.

Get access to the richest, most reliable source of health care provider information available—right now

Provider data changes all the time. In fact, our data scientists have found that:

- 2.5% of all providers change addresses or other contact information every month[1]

- 30% change their hospital or practice-group affiliations every year[1]

- 5% change their license status every year[1]

- 35% of provider listings contain errors[1]

Keeping up can be a daunting task for health insurers. In order to maintain the integrity of workflows and processes like claims processing, network management, compliance, credentialing and outreach, payers need access to reliable and comprehensive provider information in real-time.

As part of the LexisNexis® Provider Data Intelligence Suite, LexisNexis offers Provider Data Validation. This solution gives customers real-time access to the provider information needed with its powerful, easy-to-use Web search engine.

Access reliable provider data securely, anytime from anywhere

Whether you are researching new providers, helping claim service operations, or assisting with credentialing and provider maintenance, LexisNexis Provider Data Validation is invaluable.

Health Care

Provider information you can trust

In each provider search, you can find detailed, accurate and up-to-date demographic data for every provider, including:

- Provider status (e.g., deceased or retired)
- Company names and locations (including address, phone, fax and verification dates for that location)
- Group and hospital affiliations
- License number, state, type, status and end date
- DEA number, Business Activity Indicator and expiration or deactivation date
- Medical school and graduation year
- CMS specialty code
- Taxonomies (including Primary Indicator)
- Sanctions
- NPPES Health Care Provider Data (including NPI number and deactivation date)

Discover the power of the most comprehensive provider database

Over 160 million data records from more than 1,000 verified sources are distilled through our Provider Data MasterFile to create detailed, accurate and timely information on over 8.5 million providers. It's all at your fingertips via our fast, easy-to-use website. That's the power of LexisNexis Provider Data Validation. All you need is a Web browser and an Internet connection to find the information you need on practically any provider, just about anywhere, almost any time.
