

# VerifyRX™ Pharmacy Benefit Management

Real-time provider verification on prescription claims for accurate reimbursement.

**Pharmacy Benefit Management (PBM) is a complicated field made more difficult by a variety of factors. These include evolving regulations, requirements to meet individual plan specifications and ongoing changes in drug plans and U.S. healthcare at large. From pending changes in Medicare Individual Provider Enrollment eligibility to the growth of multi-tier prescription drug plans and more, PBM companies are never without challenges.**

Though PBM has changed over the years, a core responsibility has remained the same – the processing and adjudication that assure appropriate reimbursement according to plan rules.

Given this charge, the potential for change and constant scrutiny from regulators, third parties and the media, it has become a costly operational undertaking for PBM companies to maintain a reliable verification system with the up-to-date information required for accurate, expedient decision making.

LexisNexis®, helps PBM companies meet these challenges with its VerifyRx™ real-time validation system. Designed specifically for Pharmacy and PBM, this solution quickly identifies potential errors in reimbursement.

VerifyRx processes millions of transactions per day, leveraging the power of the LexisNexis HPCC® Systems proprietary supercomputing platform for big data and analytics that enables fast and accurate access to vital intelligence. HPCC Systems automatically updates reference information such as provider enrollment, DEA and state data (when available), Office of the Inspector General (OIG) sanctions and taxonomy. In addition, HPCC Systems allows for seamless integration with adjudication platforms and eliminates latency introduced with file delivery systems.

## Meeting Goals, Maintaining Viability

As an integral player in attainment of the goals of healthcare reform, the PBM industry must meet the needs of its client plans while reimbursing quickly to enable the efficient, effective delivery of pharmaceuticals.

Comprehensive Edits

Real-time Data

Advanced Analytics

Audit Defense and Traceability

High Flexibility

driven by HPCC Systems®

- **Risk Mitigation** – VerifyRx provider verification has become a widely used and vital component of compliance risk mitigation strategies to prevent costly fines and reputational damage.
- **Traceability** – With VerifyRx, all transaction data changes are logged in real-time and traceable to state and federal source data for each plan to enable audits of pharmacy and support your actions to plan.
- **Reliable Framework for Business Continuity** – Our industry-leading HPCC Systems platform leverages widely accepted open-source infrastructure, and seamless communication enables near real-time input and response times. PBM companies can count on this high-availability architecture and fully scalable environment for optimal operational performance, even at peak times.
- **Administrative Reporting and Monitoring** – VerifyRx has powerful reporting capabilities that are highly configurable so users can look at specific criteria to support their efforts to reduce risk.

## Meeting Goals, Maintaining Viability

As the health insurance roles burgeon under the Affordable Care Act and our population continues to age, payers increasingly will look to PBM service providers to facilitate cost-effective and efficient prescription drug claims. To do this, PBM companies will need tools that enable them to act quickly and surely, knowing they are doing the right thing in the right way to meet insurer requirements, manage risk and remain competitive.

The solution? Our solution: VerifyRx.
