LexisNexis® Risk Solutions, in partnership with Healthcare Dive, surveyed 110 health plan professionals about their readiness and concerns regarding the 21st Century Cures Act.

**MOST PAYERS AREN’T READY… YET**

64% Somewhat prepared or have a need for additional time or third-party help

33% Fully prepared or very prepared

**TOP 3 CONCERNS PAYERS HAVE ABOUT MEETING THE CMS INTEROPERABILITY REQUIREMENTS**

1. **39%** Protecting patient privacy and adhering to security standards
2. **19%** Compliance with information blocking and public reporting mandates
3. **14%** Ingesting incoming data from multiple disparate sources and enhancing existing member data

**PAYERS REALIZE WHAT THEY NEED MOST TO BE SUCCESSFUL:**

Survey respondents rank ordered the capabilities needed to improve their abilities to share data with providers, other payers and additional stakeholders.

68%+ ranked clean, high-quality data as either #1 or #2

**HOW CAN PAYERS MOVE FORWARD CONFIDENTLY?**

Trying to tie disparate pieces of data into one complete record requires clean, accurate data. It will be nearly impossible to meet the requirements of the 21st Century Cures Act without it.

At the Health Care business of LexisNexis® Risk Solutions, we offer industry-leading, high-quality healthcare data. It’s in our DNA, and we have the solutions to accelerate your interoperability efforts.

If you’d like to learn more about how we can help you with your interoperability efforts with high-quality data, contact us.
