

Bad provider data costs the U.S. up to \$24M a year¹

Poor quality provider data negatively impacts operational efficiency, profits and patient outcomes throughout your health system.

40%+

of provider records have missing or outdated information²

2.4%

of provider demographics change every month¹

Bad data can cost businesses

10-30%

of revenue³

30%

of doctors change affiliations each year; poor provider data increases recruitment expense¹

Inaccurate provider data reduces the likelihood of efficient patient and physician communication—
impacting quality of care

Inaccurate discharge data can lead to **redundant treatment and frustration** by the referring provider

LexisNexis® Provider Data MasterFile™ provides comprehensive, up-to-date data, enabling hospitals and health systems to improve patient and provider experience, improve quality and outcomes, and lower costs.
