

Are you ready to comply with Regulation 455?

Every prescription transaction is an opportunity for fraud, and billions of dollars are lost each year through improper payments to providers.¹

How will you identify potential fraud before it puts your organization at risk of audits and penalties, affects your bottom line or jeopardizes patient safety?

LexisNexis® Health Care recently presented the topic of CMS Regulation 455 to nearly 100 representatives from some of the leading PBMs. Here's what they told us:

Nearly **60%** had more than 40,000 pharmacies in their network

70% process Medicaid prescriptions

Nearly **70%** use automated systems to screen their network

76% perform screening internally

How do you rate your screening process?

PBMs that screen internally

Only 13% rated their screening process as excellent

PBMs that screen externally

Only 38% rated their screening process as excellent

For more information about how to comply with CMS 455 and screen your network with confidence, call **866.396.7703** or visit risk.lexisnexis.com/healthcare/pharmacy
