

LexisNexis® Automobile Liability Insurance Reporting System

Focus resources on growing your business
instead of running in circles over compliance.

As more states move toward online verification models, LexisNexis® Automobile Liability Insurance Reporting System (ALIRtS®) remains the insurance industry's end-to-end solution for mandatory automobile liability coverage reporting to state motor vehicle departments (DMVs).

LexisNexis ALIRtS leverages a single data submission from your company to help you:

Minimize IT costs

By using your existing LexisNexis® Current Carrier® data feed, ALIRtS eliminates the need to develop and maintain an internal automobile liability insurance reporting system capable of reporting to states and managing error and verification data.

Reduce compliance risk

We facilitate compliance in a dynamic regulatory environment by monitoring requirements and adjusting

our ALIRtS solution to reflect state-mandated changes in reporting formats, transmission protocols, data content and filing frequency.

Streamline processes

Our ALIRtS VIN Correction process provides correction information, when available, for vehicle identification numbers (VINs) that have been rejected by states and produces consolidated error and submission reports.

Supporting compliance so you can focus on business

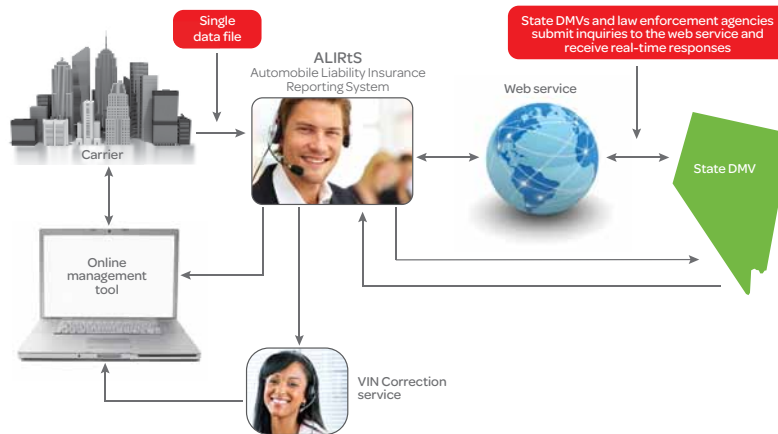

ALIRtS enables insurance carriers to focus on their business process by helping them meet the mandatory automobile liability coverage reporting requirements of state DMVs.

The ALIRtS compliance solution:

- Analyzes data contributed to our Current Carrier database to identify reportable events such as a new policy, the addition of a vehicle or a change in insurance carriers.

**Risk Solutions
Insurance**

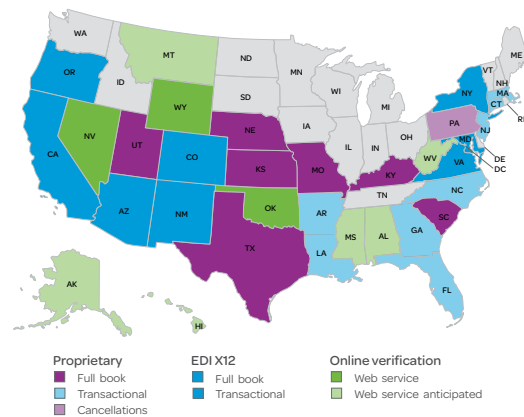

ALIRTS is an automated compliance solution that can be deployed rapidly in traditional and online verification environments.

- Consolidates verification requests and errors from different states in a standardized format.
- Offers detailed error analysis, which significantly reduces the number of state-returned errors.
- Interfaces directly with VIN Services to provide corrected VINs.
- Allows states to verify insurance coverage online in real time.

Subscribing carriers can take advantage of the ALIRTS web portal to:

- View activity reports and statistics regarding state transactions.
- Review and manage verification requests and errors.
- Track a specific vehicle or VIN, including its history.
- Learn which vehicles or policies have been the subject of state queries and whether the response was verified or unverified.
- Automate and expedite suspension clearance, verification response and error resolution.
- Serve as a single point of contact for all state issues.

Reporting requirements—including the type of data, their format and how often they are submitted—vary widely from state to state.

LexisNexis Risk Solutions is part of Reed Elsevier, a leading publisher and information provider that serves customers in more than 100 countries with more than 30,000 employees worldwide.

Our insurance solutions assist insurers with automating and improving the performance of critical workflow processes to reduce expenses, improve service and position customers for growth.

The ALIRTS services are not provided by “consumer reporting agencies,” as that term is defined in the Fair Credit Reporting Act (15 U.S.C. § 1681, et seq.) (“FCRA”) and do not constitute “consumer reports,” as that term is defined in the FCRA. Accordingly, the ALIRTS service may not be used in whole or in part as a factor in determining eligibility for credit, insurance, employment or another purpose in connection with which a consumer report may be used under the FCRA. Current Carrier is a consumer reporting agency product provided by LexisNexis Risk Solutions and may only be accessed in compliance with the Fair Credit Reporting Act, 15 U.S.C. 1681, et seq. Due to the nature of the origin of public record information, the public records and commercially available data sources used in reports may contain errors. Source data is sometimes reported or entered inaccurately, processed poorly or incorrectly, and is generally not free from defect. This product or service aggregates and reports data, as provided by the public records and commercially available data sources, and is not the source of the data, nor is it a comprehensive compilation of the data. Before relying on any data, it should be independently verified. LexisNexis, Lexis, Nexis and the Knowledge Burst logo are registered trademarks of Reed Elsevier Properties Inc., used under license.
