

Keep your business moving.

C.L.U.E.® Auto finds more claims history per inquiry than any other source.

LexisNexis® C.L.U.E.® Auto is a claims history information exchange with 99.6 percent industry contribution. C.L.U.E. Auto contains up to seven years of personal automobile claims matching the search criteria submitted by the inquiring insurance company.

With its leading-edge linking capabilities and advanced big data processing platform, HPCC Systems, LexisNexis® C.L.U.E.® Auto discovers more claims per inquiry than any other available source.

Data provided in C.L.U.E. reports include policy information such as name, date of birth and policy number; claim information such as date of loss, type of loss and amounts paid; and vehicle information.

C.L.U.E. Auto helps insurers:

- Speed the underwriting function by providing quick and easy access to comprehensive data
- Receive results interactively in a timely and reliable fashion via flexible delivery systems
- Reduce risk and liability by assisting underwriters in predicting future claims
- Make better informed, more immediate business decisions

In a 2012 study conducted by LexisNexis on a group of insurance applicants reported by third parties as having no prior claims history and not requiring a C.L.U.E. Auto report, applicants were run through C.L.U.E. Auto for the first time and 49 percent were found to have had prior claims history. The lifetime premium leakage associated with those missed claims totaled over \$1 million.

C.L.U.E. Auto, which commemorates 25 years of insurance claims history for the auto insurance industry in 2012, uses LexIDSM proprietary linking technology and access to more than 40 billion public and proprietary records from more than 10,000 sources. LexID is the fastest linking technology available, enabling customers to identify, organize information quickly and link records together.

LexIDSM is the ingredient behind our products that turns disparate information into meaningful insights.
