

Loss runs have traditionally served as a critical tool for evaluating risk in commercial insurance. Acquiring and formatting these prior loss runs manually comes with considerable costs due to added time and resources.

LexisNexis® C.L.U.E.® Commercial is an industry-wide contributory database that provides access to claims information across all standard lines of business, including:

Small Commercial

- Business
 Owner's Policies
- Farm Policies

Business Insurance

- Commercial Package Policy
- Commercial Property
- General Liability
- Crime

Artisan

• Inland Marine

Contractors

- Umbrella
- Excess Liability

Commercial Auto

- Commercial Fleet and Non-Fleet auto
- Truckers
- Garage Liability and Garagekeepers Legal Liability

Workers' Compensation

LexisNexis receives detailed claim information from across the commercial insurance industry and delivers a single, standardized result through C.L.U.E. Commercial. This industry standard provides the ability to receive and analyze loss runs in an interactive and consistent format regardless of which carriers provide the claims information. C.L.U.E. Commercial offers a convenient way for insurers to share information and take advantage of loss history insights provided by contributors—all from one of the industry's most trusted providers of insurance information.

The benefits of C.L.U.E. Commercial

Build a healthier book

When you have commercial claims, data available on demand, you can make informed decisions about risk pricing.

Using C.L.U.E. Commercial, you can:

Discover prior claims and price your risk accordingly

To demonstrate the financial impact of failing to take advantage of C.L.U.E. Commercial, we ran a test using policy data from a sampling of carriers to identify undisclosed losses. Using C.L.U.E. Commercial we discovered that three carriers had more than 2,000 claims totaling approximately \$30 million in prior losses the carriers were not aware of at the time of quote. Of that \$30 million, over 30% were attributed to only 12 policies—less than 1% of the claims*.

^{*} Statement based on analysis prepared by LexisNexis, individual results may vary.

- Gain a new level of insight on property risks

 Businesses may come and go, taking their owners—and information about current claims—with them. Our address-only search feature lets you gather historical data about all claims associated with a location, across multiple tenants and owners.
- Insights on driving behaviors
 Searching for activity on drivers vs. businesses gives you insight on how that driver has performed in the past regardless of their prior employers. The drivers that you have today, may not be the drivers you have tomorrow. Do you have a good understanding of how your current drivers have performed in the past?

Gain efficiencies

Utilizing a robust contributory database, leveraging state of the art technology, and receiving information on demand alleviates the manual effort from the loss-run acquisition process and helps to reduce the time agents and brokers devote to information gathering.

Know—and serve—your client better

The picture painted by a C.L.U.E.® Commercial report allows you to efficiently generate more accurate quotes, and continue to offer the most relevant products and services throughout the client relationship.

What's the next step?

Contact your LexisNexis account representative to begin the contribution step.

Realize immediate value with access through our online portal as soon as contribution is complete.

Optimize the process by integrating C.L.U.E.* Commercial directly into your systems workflows.

Verify loss details and ensure consistency of data

Discover undisclosed losses

Reduce policy acquisition expenses

Get updates on open reserves from prior carriers on renewals

Discover prior auto claims on drivers from previous employers

Discover additional prior auto claims through personal auto claims on drivers

Discover prior property claims on commercial buildings

Discover additional prior property claims through personal property claims on home-based businesses
