

Fulfill the Promise: Enable Prompt, Accurate Claim Settlement

Automated recurring deceased searches help ensure timely payments to beneficiaries.

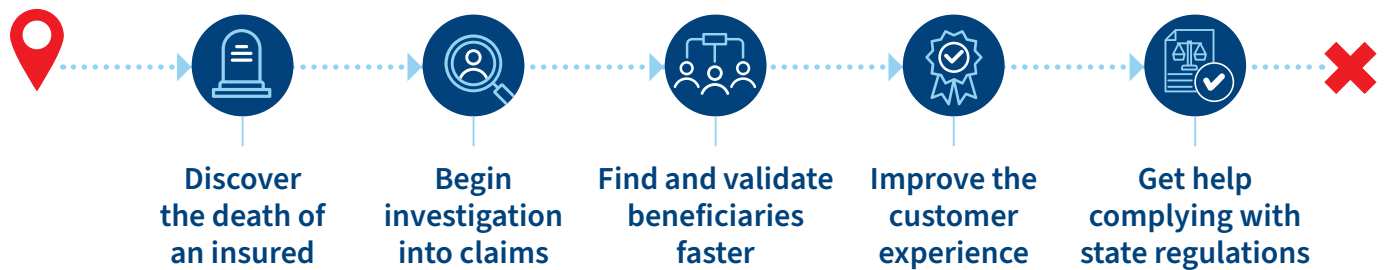

LexisNexis® Unclaimed Property Monitoring

Monitoring with LexisNexis® Unclaimed Property helps to automate death record updates and simplify your claim processes. Receive the most current and comprehensive deceased information to ease the burden on dedicated resources to manually search for deaths among your books of business.

Seamless and simple to implement

Simply send us the file of individual records. LexisNexis® Risk Solutions will monitor the files for death events, then send you the events in the frequency you select, empowering you to better manage workflow and improve efficiency.

LexisNexis® Risk Solutions fills the mortality data gap

Once considered the sole source for deceased and mortality data, the Social Security Administration Death Master File (SSA DMF) volume has significantly decreased. A series of regulations along with growing administrative hurdles have caused the number of deaths listed in the database to shrink.

The Social Security Administration Limited Access Death Master File (LADMF) continues to shrink and accounted for only 16% of the total deaths we added to our deceased database in 2023.¹

To bridge that data void, monitoring with Unclaimed Property continues to secure additional deceased and mortality data. These supplemental deceased sources now contribute far more deaths each year than the SSA DMF.

Next-level accuracy

In addition to delivering comprehensive data, monitoring with Unclaimed Property delivers match codes and confidence scores to provide you with more precision, minimizing false positives and false negatives. As an automated batch process, it helps you avoid repetitive, costly searches and accelerate the claims process.

Monitoring with Unclaimed Property:

- Leverages comprehensive, industry-leading LexisNexis® Risk Solutions public record data sets
- Integrates with your existing workflow and is easy to use
- Returns deceased data in the frequency that works for you
- Offers exceptional process flexibility and customization

Stay compliant with increased confidence

Deceased searches through monitoring with Unclaimed Property are designed to support compliance with the most stringent regulatory settlement agreements and state laws. LexisNexis Risk Solutions also maintains the required security certification via an Accredited Conformity Assessment Body (ACAB) for SSA DMF. Additionally, our Government Affairs team helps us stay ahead of regulatory changes.

Streamline death record updates

Monitoring with Unclaimed Property enables you to:

Free up internal resources

Reduce expenses by automating a manual process

Boost organizational efficiency by delivering information in a timely manner

Better manage workflow with deceased data returned at your chosen frequency

At LexisNexis Risk Solutions, we are committed to data responsibility, privacy and security to help our customers keep promises — especially those that provide financial security and a better future for those left behind.

Unclaimed Property from LexisNexis and LexID are not provided by “consumer reporting agencies,” as that term is defined in the Fair Credit Reporting Act (15 U.S.C. § 1681, et seq.) (“FCRA”) and do not constitute “consumer reports,” as that term is defined in the FCRA. Accordingly, Unclaimed Property from LexisNexis and LexID may not be used in whole or in part as a factor in determining eligibility for credit, insurance, employment or for any other eligibility purpose that would qualify it as a consumer report under the FCRA. Due to the nature of the origin of public record information, the public records and commercially available data sources used in reports may contain errors. Source data is sometimes reported or entered inaccurately, processed poorly or incorrectly, and is generally not free from defect. This product or service aggregates and reports data, as provided by the public records and commercially available data sources, and is not the source of the data, nor is it a comprehensive compilation of the data. Before relying on any data, it should be independently verified. LexisNexis and the Knowledge Burst logo are registered trademarks of RELX Inc.
