

Modern Eligibility Starts with Trusted Verification

Direct-to-source income and employment verification that can help accelerate eligibility decisions, reduce administrative burden and strengthen program integrity.

A cost-efficient path to eligibility decisions

Agencies are under pressure to deliver timely access to benefits while managing growing workloads, compliance requirements and program integrity risks. Compounding this strain are legacy solutions that are costly and inefficient. Income verification can remain a critical bottleneck — often dependent on manual processes, documents and fragmented data sources that slow eligibility decisions.

By modernizing income and employment verification workflows, agencies can help reduce administrative burden, accelerate decision timelines and help eligible residents access services faster.

Introducing a new model for income verification

*The proven choice for government agencies, Income Verification Powered by Truv is a consumer-permissioned, direct-to-source solution that can help enable agencies to verify income and employment data without relying on documents or third-party databases. **This isn't faster document collection; it can help eliminate the need for documents.***

Instead of collecting, reviewing and validating paperwork, agencies can receive data directly from payroll and financial institutions, securely authorized by the applicant.

This approach can help reduce delays, minimize manual processing and provide decisionable, audit-friendly data that can help strengthen program integrity while accelerating access to benefits.

How it works

Applicant Authorization

Applicant Authenticates:

Secure login connects directly to payroll or financial providers with no paperwork required.

Trusted Data Access

Permissioned Data Access:

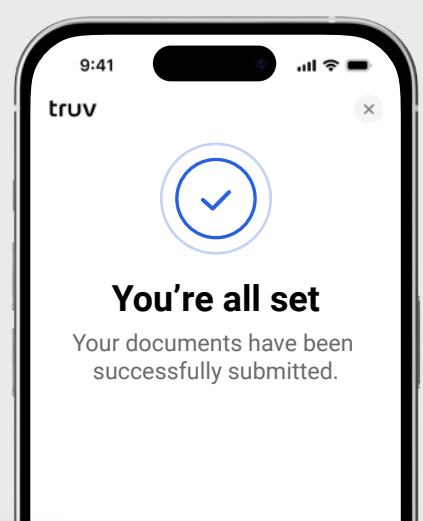

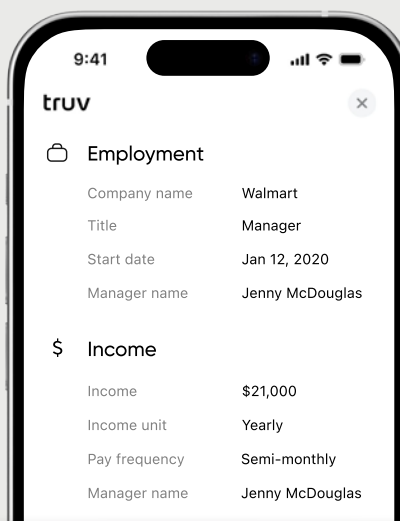

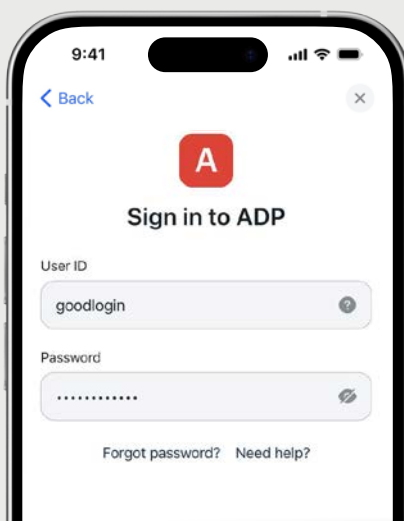

Only the data the applicant authorizes is retrieved directly from the source.

Eligibility Decision

Decisionable Insight Delivered:

Data flows directly into eligibility systems, helping to reduce processing time and caseworker burden.

Comprehensive verification for modern eligibility programs

Income Verification Powered by Truv provides compiled coverage across all primary applicant profiles:

Verify Wage Earners Faster

Coverage across 96% of the U.S. workforce — including expanded visibility into the gig economy, where traditional employment verification has gaps — means more applications can be verified, helping to reduce exceptions and fallback processes.

Backed by 21K+ integrations across approximately 2.3 million employers, enabling near real-time digital confirmation straight from source payroll systems.

Support Complex Income Scenarios

Coverage across 14,000+ financial institutions leveraging over 75% secure OAuth connections.

Access granular transaction histories, large deposit monitoring and customized historical reporting for self-employed applicants.

Automate Document Review with AI

AI-driven document processing protects against fraudulent data with 99.9% accuracy, helping to ensure document authenticity, preventing fraud attempts and auto-detecting and restoring altered fields.

What this can unlock for your agency

Access to benefits

Help reduce application backlogs and resident wait times

Program integrity

Direct-from-source data can minimize fraud exposure

Decisionable data

Traceable, permissioned data trails

Lower operational burden

Help reduce manual verification and rework

Proven government track record

Help reduce implementation risk and speed time to results

Why agencies are modernizing income verification

- **Consumer-permissioned first** — helps increase completion rates
- **Direct-to-source connections** — no intermediaries or stale datasets
- **Compiled across income and documents** — fewer vendors to manage
- **Budget-neutral scalability** — helps increase verification volume without driving up costs
- **Built for government workflows** — can help support compliance, auditability and scale

Built for government agencies

Designed to help support FCRA compliance, audit readiness and secure data handling with encryption and SOC 2 controls.

See how your agency can expedite the income verification process.

About LexisNexis Risk Solutions

LexisNexis® Risk Solutions provides customers with information-based analytics and decision tools that combine public and industry-specific content with advanced technology and algorithms to assist them in evaluating and predicting risk and enhancing operational efficiency. Headquartered in metro Atlanta, Georgia, the company has offices throughout the world, serves customers in more than 190 countries and territories and is part of RELX. For more information, please visit LexisNexis Risk Solutions.

LexisNexis Risk Solutions is an authorized reseller of the Truv services.

LexisNexis Income Verification Powered by Truv (Truv) is provided by Truv to customers of LexisNexis Risk Solutions. The Truv services are not a LexisNexis product. Applicants actively permission their own data for use in the Truv services. The data is considered the property of the applicant. Through the Truv services, applicants assemble their own data, review, and may approve distribution to customers that have purchased LexisNexis Income Verification Powered by Truv. As a result, the Truv services are not provided by “consumer reporting agencies,” as that term is defined in the Fair Credit Reporting Act (15 U.S.C. § 1681, et seq.) (“FCRA”) and do not constitute “consumer reports,” as that term is defined in the FCRA.
