

Gain access to 9.2 billion vehicle sightings for your investigations

Tap into the unique benefits of license plate recognition technology and vehicle location data through Accurint® for Private Investigations.

The vehicle location history search within LexisNexis® Accurint® for Private Investigations is a valuable tool for uncovering potential fraud, locating stolen vehicles and assisting with investigations. The feature—powered by Digital Recognition Network license plate recognition technology—provides access to 9.2 billion nationwide vehicle sightings with more than 165 million new sightings captured each month.

Real-time access to photos provides more accurate location insights

The vehicle location history search within Accurint for Private Investigations provides useful data to investigators, including the following:

- Color vehicle overview image
- Infrared license plate image
- License plate number
- Date/time of sighting
- Map view of the sighting

Quickly discover potential fraudulent or suspicious behavior

Search by plate or address to get all of a particular vehicle's location data, including the plate image, vehicle image, date, time and location. This functionality allows users to determine the likelihood of a location “sighting” and also offers insight on vehicle “travel” for those owned and operated by subjects.

Isolate and search geographic areas

Extensive data mapping allows users to achieve a geographic display of real-time vehicle location information and new license plate reader-obtained addresses based on matches to the subject's license plate. Geo-zoning allows the user to actively search an area of interest within a given geographic area including additive target time frame.

LexisNexis® Accurint® for Private Investigations – Vehicle Location History
