

Introduce Sanctioned Bank Warnings into Customer-Facing Payments Channels

Achieve an early line of defense against compliance risk while improving operational efficiency and customer experience.

API Solution for Banks

With sanctions data in LexisNexis® Bankers Almanac® Validate™, introduce sanctioned bank warnings into customer-facing payments channels — such as mobile banking — and enable real-time decision-making before initiating payments.

What are the Benefits?

1 Prevent Customer Frustration

Empower customers to decide whether or not to proceed with payments and:

- Avoid unnecessary processing delays, repairs and costly failed payments later in the payments journey.
- Accelerate the end-to-end payments process.
- Achieve higher straight-through processing rates.

2 Improve Compliance Posture and Complement Existing Sanctions Processes

- Preemptively identify risk at the start of the payments flow and add an additional layer of security that complements existing FCC controls.
- All data is **updated daily** and sourced from:

HM Treasury Sanctions List

EU Consolidated List of Sanctions

UN Sanctions List

Global Watch List Data

OFAC Sanctions List

3 Reduce Staff Workload

- Decrease the volume of customer-initiated payments to sanctioned banks and spend less time handling alerts and easing frustrations when funds are quarantined.

The Impact of Early Screening

Drive Safer, Faster and Cost-Effective Payment Journeys

Banks use Bankers Almanac® Validate™ to facilitate secure instant payments and achieve exceptional straight-through processing rates, preventing operational delays and failed payment fees.

In real time, the API verifies global payment information and auto-populates payments and routing data in over 200 countries.

Easily integrate the API into customer and internal-facing payments channels to drive automation in payment journeys, so that you can:

- Spend less time maintaining global payments and routing data.
- Reduce errors caused by mis-keyed payment instructions from customers.
- Increase straight-through processing rates and avoid unnecessary repair fees from correspondent banks.
- Prevent delayed or failed payments and dramatically improve customer satisfaction.
