

Introduce Sanctioned Bank Warnings at the Point of Payment Initiation

Achieve an early line of defense
against compliance risk while
improving operational efficiency.

API Solution for Corporates

With sanctions data in LexisNexis® Bankers Almanac® Validate™, introduce sanctioned bank warnings into payments channels and enable real-time decision-making before initiating payments.

What are the Benefits?

1 Sanctions Data Updated Daily

Empower staff to decide whether or not to proceed with payments and:

- Avoid unnecessary processing delays, repairs and costly failed payments caused by outdated sanctions lists.
- Accelerate the end-to-end payments process.
- Achieve higher straight-through processing rates.

2 Improve Compliance Posture and Complement Existing Sanctions Processes

- Preemptively identify risk at the start of the payments flow and add an additional layer of security that complements existing FCC controls.
- All data is **updated daily** and sourced from:

HM Treasury Sanctions List

EU Consolidated List of Sanctions

UN Sanctions List

Global Watch List Data

The Impact of Early Screening

Drive Safer, Faster and Cost-Effective Payment Journeys

Corporates use Bankers Almanac® Validate™ to facilitate secure instant payments and achieve exceptional straight-through processing rates, preventing operational delays and failed payment fees.

In real time, the API verifies global payment information and auto-populates payments and routing data in over 200 countries.

Easily integrate the API into customer and internal-facing payments channels to drive automation win payment journeys, so that you can:

- Stop manually managing your master payments data.
- Reduce the number of delayed payments caused by payment instructions with incorrect master data.
- Prevent unnecessary fees charged by partner banks repairing and investigating payments.
- Improve vendor and supplier relationships with one source of payments truth.
