

LexisNexis® Accurint® Triggers Monitoring

Proactive, Automated
Updates for More Effective
Portfolio Management

Your ability to collect outstanding debt ahead of other collectors dramatically improves when you have access to more accurate consumer information including public records, alternative data, indicators of financial distress like civil liens and judgments, bankruptcy and more to segment your portfolios. Apart from depleting internal resources, the process of continually searching for updated consumer contact information is often difficult and time consuming for many organizations.

LexisNexis® Accurint® Triggers Monitoring delivers alerts on the identity, location, property and legal changes that matter — powered by over 50 years of data intelligence.

Building on more than 50 years of experience gathering and managing sensitive data, LexisNexis® Risk Solutions aggregates powerful insights from the Risk Intelligence Network and strategic data suppliers. With our advanced analytics and patented linking technology, insights are linked to the corresponding LexID® profile — with over 99.99% precision — and transformed into actionable intelligence to solve critical risk challenges **across fraud, identity, credit, collections and compliance.**

This foundation provides differentiated visibility into physical and digital identity, property and assets, behavioral insights and associated risks, enabling Accurint® Triggers Monitoring to detect early signals that other providers often miss.

Timely triggers, delivered faster

LexisNexis® Accurint® Triggers Monitoring eases this burden by regularly alerting your collectors when new contact, locate consumer indicators and segmentation data are available, using an automated batch process that easily integrates within your existing workflow. These updates help you avoid repetitive and costly online and batch searches and accelerate the collections process.

Exceptional process flexibility and customization allows you to configure the attributes, select “all updates” or only receive updates to specific data, based on your specific needs and workflow. Our solutions include FCRA and non-FCRA data.

Best of all, Accurint® Triggers Monitoring leverages proven, industry-leading LexisNexis® Risk Solutions public record data sets to help ensure you receive more detailed, relevant information.

Contact Consumers Faster

Regular, electronic updates boost your Right-Party Contacts (RPCs) to help you quickly contact consumers, ultimately enhancing your collection rates.

Customize Your Process

Flexible options enable you to choose only the solutions you need, with updates on your schedule.

Minimize Costs

Accurint® Triggers Monitoring offers one of the largest data libraries in the industry, providing more detailed, updated information on consumers.

Contact Triggers

- Home, Cell and Work Phone Updates
- Landline to Cell Changes
- Disconnected Phones Indicator*

Locate Triggers

- Address Updates
- Mail Return
- New Address Intelligence
 - Commercial or Residential

Property Triggers

- Ownership Changes
- Additional Properties
- Pre-foreclosure
- Foreclosure

Criminal Triggers

- New Conviction
- New Releases
- New Incarceration

Compliance Triggers

- Deceased
- Bankruptcy
- TCPA
- Regulatory (REG F)
- Phone Change Alert (TCPA)
- Phone Disconnect Verify
- Phone Ownership
 - New Filing
 - New Satisfaction

Accurint Triggers Monitoring is designed for simplicity and efficiency, so your team can remain focused on core objectives. Here's how it works:

- 1** Provide the accounts you wish to add, remove, update or specify monitoring parameters for. The solution is fully configurable.
- 2** LexisNexis® Risk Solutions securely stores and continuously monitors your account files for triggers that you have defined as most important.
- 3** When a monitored parameter change occurs, you receive an update without having to manually review.

**Act on consumer changes the moment they matter.
Accurint® Triggers Monitoring gives collections teams the insight they need to improve contact rates, reduce risk and work more efficiently.**
