LexisNexis® TrueID® DOCUMENT AUTHENTICATION

Streamline authentication and biographic data extraction

Optical character recognition (OCR) and barcode decryption extract the biographic data quickly and accurately.

Extracted data can be used to prepopulate forms and automate workflows and match selfie.

Automated forensic tests using a patented ID library check and identify suspicious items that may be invisible to the naked eye.

The image is securely sent to a hosted document authentication service for validation or immediately authenticated on a PC.

Capture an image of the ID document and an optional selfie with a mobile camera.
