

Payments Solutions Powered by Dynamic Data

Drive efficiencies in payment processes and enable safer, faster and cost-effective payments journeys with global payments files and API technology.

Where Does Our Data Come From?

100+ professionals
conduct ongoing research.

24-hour data
continuously collected.

17 languages
spoken.

Data compiled, validated and enriched

from **300+** official sources.

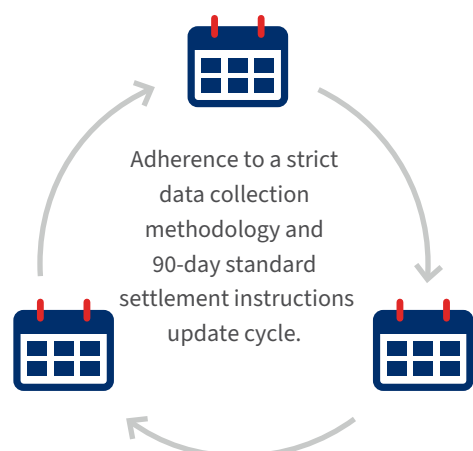

Where there isn't an official central source, we go directly to the banks.

Issuers are constantly monitored for clearing code and network changes. We do not passively wait for information to be pushed to us.

We track the age of our data, and present the validation date within our solutions.

Coverage of local clearing codes and optimized SWIFT/BIC pairings.

235+  **100%**

countries with clearing codes.

coverage of SWIFT/BICs.

Our data continues to grow in this fast-moving and ever-changing market:

 **1,450,000+**
branch locations.

 **1,370,000+**
total clearing codes.

 **390,000+**
standard settlement instructions.

 **65,000+**
financial institutions.

 **200**
clearing systems.

Data collected from over 300 data points, ensuring you have what you need to avoid payment delays.

We provide full branch code identifiers and the different bank code sets required when there are multiple clearing systems in one country.

“ The investment of LexisNexis® Bankers Almanac® license is immediately saved due to the accuracy of payments. Having used a competitive product in the past, I find this the best product on the market, particularly due to accuracy.”

Senior Manager, Operations
First Gulf Bank
